Media Release

Injured Victims in Yesterday's Crash in Lyon County Identified; Names of Fatality Victims are Pending

The names of the three injured victims in yesterday's horrific fatality crash involving three vehicles in Lyon County on US Highway 50 are being released today while the names of the four fatality victims won't be released until the Washoe County Medical Examiner's Office positively confirms their identity. This process may not be completed until Friday.

The fiery crash involving three vehicles, each towing a trailer, happened yesterday morning shortly before 9:00 am as troopers from the Nevada Highway Patrol were dispatched to the multiple-vehicle collision which occurred approximately 10 miles east of Dayton near mile marker 21, or just several hundred feet west of Caroline Way. The crash investigation details investigated so far indicate that a 1989 Dodge Ram 250 pick-up pulling a double-axle livestock trailer carrying 8 young steers or heifers was traveling eastbound on the two-lane highway. Following behind the Dodge and green trailer was a 1995 Ford F-350 towing a white livestock trailer carrying 7 full grown cows. Both of these pickups had only one passenger riding in the cab.

Traveling westbound approaching the Dodge truck was a GMC crew cab pickup towing a 2-axle flatbed trailer transporting a piece of equipment labeled as an electric scissor lift. Witnesses to the event stated the Dodge pick-up veered into the oncoming lane possibly because the livestock trailer was swerving back and forth or fishtailing. The front of the Dodge struck the left front portion of the GMC pick-up in the westbound travel lane. Upon colliding, both pick-ups caught fire while the green livestock trailer separated or became unhitched from the truck. The green trailer struck the concrete barrier on the north roadway edge and then veered into the eastbound lane where it struck the eastbound white Ford pickup. The Ford pickup and white trailer remained hitched and skidded off the south roadway edge. The white trailer remained upright while the Ford rolled over onto its left side.

The driver of the Dodge truck sustained very serious injuries and was taken from the scene by Care Flight to Renown Regional Medical Center in Reno. He has been identified as **19-year-old Daniel Holley of Dayton** while the two occupants of the Ford pick-up, **47-year-old Robert L. Holley of Dayton (Daniel's father), and 9-year-old Anna Holley (Daniel's sister)**, were transported by ground ambulance to Renown with minor to moderate injuries. Daniel was transferred to the University of California, Davis Medical Center late last evening and his updated medical condition and that of Robert and Anna was not known as of 8:00 am this morning.

As for the livestock involved in the crash, the green trailer overturned and ejected all 8 yearlings. One died at the scene and the other 7 had some visible injuries. 6 of the 7 were gathered quickly and placed into a holding pen by local residents in the area while the other yearling remained loose. The seven adult cows did not appear to be injured at all. All 14 bovines were later transported to Fallon to be checked by a veterinarian. The animals were apparently being transported from the Dayton area to the Fallon Livestock Exchange.

The highway was closed immediately following the collision and was later re-opened shortly after 5:00 pm; however, personnel from the Nevada Department of Transportation and Granite Construction assisted our agency with the traffic dilemma by rerouting traffic onto the adjacent sides of the highway shortly after the crash occurred.

Trooper Doug Hildebrand of the Major Accident Investigation Team or M.A.I.T. is investigating this case. Witnesses to the event are encouraged to call him at (775) 689-4623 regarding case number NHP-120814458.
