Nevada Division of Emergency Management/Homeland Security Offers Interoperability Communications Seminar

The Nevada Division of Emergency Management/Homeland Security, Washoe County Sheriff's Office and Washoe County Emergency Management is offering an Interoperability Communications Seminar, "Bridging the past and connecting the future through Communications." This seminar is for Emergency Managers, Communications Technicians and Operators, and users of interoperable communications systems within Nevada.

"The May 9th, 10th, and 11th Nevada Interoperability Communications Seminar (NICS) is geared to clearing up all the "techno-language," discussing how to smartly use what we have, and how to efficiently govern and understand what's coming," Statewide Interoperable Communications Coordinator Jeffrey L. Yeagley said. "Awareness of where we were and how we got to where we are will undoubtedly lead us into the future, but the NICS goes several steps beyond that by providing live demos and break-out sessions for hands on, fully engaged participation," Yeagley said.

WHEN: May 9th, 10th, 11th 2012
8:30 AM to 5:00 PM
