### **Media Release**

#### IR-15 South to be Closed at Stateline

In conjunction with Caltrans and the California Highway Patrol, the Nevada Highway Patrol is advising that there will be a full closure of IR-15 southbound at the Nevada/California state line during the early morning hours of Wednesday, June 17, 2015. All southbound I-15 traffic will be held at Primm, NV from 1:00 a.m. to 4:00 a.m. for overhead sign installation in California.

The sign installation is part of the on-going \$40 million project to build the new California Highway Patrol (CHP) Commercial Vehicle Enforcement Facility (CVEF) on southbound I-15 just south of Yates Well Road near the Nevada state line.

There are no viable detours to avoid the closure on southbound IR-15, so all traffic will be diverted off at Primm and held during the closure hours. Truckers and other travelers are advised to plan ahead and avoid the closure. If you must travel on southbound I-15 during these hours, be prepared, bring water and ensure that your vehicle is in good running condition.

There is parking and facilities available at Primm, Nevada for food and restrooms. Again, the best plan is to avoid the closure and travel before 1:00 a.m. or after 4:00 a.m. on Wednesday, June 17, 2015. For further information, you can contact either Trooper L. Hixson at 702-533-6808 or Trooper C. Stuenkel at 702-469-3882.
